## WORK EXPERIENCE

### Developer Relations Associate
Clarifai ↗

*01/2022 - Present*

*A leading Generative AI, NLP, and computer vision production company for modeling unstructured image, video, text, and audio data*

Tasks

- Creating technical blog posts, tutorials, changelogs, and documentation to facilitate developers' understanding and adoption of the company's APIs and SDKs.
- Translating complex machine learning concepts into simple, polished, and engaging content.
- Collaborating with the product team to gather developer feedback and providing valuable insights for improving product features and usability.
- Taking ownership of the company's documentation and ensuring it reflects its latest offerings and advances in the AI space.
- Effectively working independently in a fast-paced and fluid environment, and conveniently spotting issues early, and escalating to the proper teams.

### Full-Stack Web Developer & Technical Writer
Freelance

*02/2014 - 01/2022*

Tasks

- Utilizing modern frameworks and approaches to undertake comprehensive programming tasks for front-end websites as well as challenging back-end server code.
- Collaborating with other engineers remotely to write well-designed, testable, and efficient code.
- Continuously learning new technologies and best practices for building robust, secure, and agile applications.
- Writing administration guides, technical overviews, online help, tutorials, etc.—to crunch complex technological concepts into user-level language.
- Creating and evangelizing high-quality technical documentation, how-to's, and references to enhance the adoption of software releases.
- Implementing on-site and off-site optimization, content management, social media promotion, and other digital marketing strategies to spur the dominance of brands.

*Some past clients : Rakuten RapidAPI , Mend.io (formerly WhiteSource, Neptune.ai, Mailtrap, - Paymentology (formerly Tutuka ), Stoplight (via Lemonpie.fm), FusionAuth , and Gravitee.io.*
